

## Opportunity Assessments

A Program of the New York Power Authority

### Your clean energy plan starts with an audit, feasibility study and cost-benefit analysis

NYPA offers a full range of services to help you get started on your clean energy journey. These services range from audits to a clean energy master plan. We review your building data, infrastructure and energy usage – and pair them with your goals and available incentives – to arrive at a cost/benefit analysis and opportunity assessment.

We provide customized assessments in all areas of clean energy – including energy efficiency upgrades and LED street lighting to renewables, solar + storage, community solar, EV infrastructure and digital energy management.

As a New York State authority, NYPA is your trusted advisor. We provide the information and guidance to develop the best plan to meet the needs of your organization. We can help you meet goals set forth by New York State's Climate Leadership and Community Protection Act (CLCPA).

### Assessment Services

NYPA offers the following services to meet the needs of local governments, K-12, higher education, state agency, hospital, not-for-profit and business customers:

#### Benefits

When you work with NYPA, you get:

- **End-to-end capabilities.** Advisory and implementation expertise across all clean energy and energy efficiency solutions – with the ability to develop the best end-to-end plan for you
- **Cost savings.** Comprehensive view of energy saving opportunities – to maximize your benefits and save costs
- **No upfront cost.** NYPA can minimize upfront costs – and for qualified customers, can structure the assessment as part of a long-term loan
- **Incentives.** Knowledge of utility and NYSERDA incentives – and we submit the application on your behalf
- **Contracting and procurement.** Expertise working with government entities on large-scale energy upgrades. We pre-certify contractors to streamline the procurement process

Services	Description
 <b>Virtual Audits</b>	Virtual audits provide a benchmark to help customers understand where best to focus their energy efficiency efforts.
 <b>Feasibility Studies</b>	Feasibility studies include a review of technology, infrastructure and site considerations to establish the viability of moving forward with a particular energy efficiency project.
 <b>Audits</b>	ASHRAE has established a set of audit standards, and we offer targeted audits and Level I, II or III analysis based on your needs. We can help you meet the State's audit, retro-commissioning and master planning requirements.
 <b>Clean Energy Master Plans</b>	A Clean Energy Master Plan (CEMP) is a comprehensive audit with a full roadmap and project support to meet your energy needs. The CEMP is an end-to-end offering that starts with a cost/benefit analysis and review of available incentives, and includes contracting/procurement support through to implementation and monitoring of goals. We develop your CEMP around short- and long-term goals related to renewables, energy efficiency, EV infrastructure and commissioning.
